Section 23: All

APPLICATION

On November 27, 2017, ConocoPhillips Company (Operator No. 19160) and its wholly owned subsidiary Burlington Resources Oil & Gas LP (Operator No. 26580) (together, "COPC" or "Applicant"), filed a verified application pursuant to §34-60-116, C.R.S. for an order to:

1) Authorize an additional two horizontal wells, for a total of up to four horizontal wells, in an approximate 1,280-acre drilling and spacing unit established for Sections 22 and 23, Township 5 South, Range 65 West, 6th P.M., for production and operation of the Niobrara Formation.

2) Provide that the productive interval of each proposed horizontal well shall be no closer than 460 feet from the boundaries of the unit (regardless of the lease lines within the unit) and all horizontal wells shall be no closer than 150 feet from the productive interval of another well producing from the same source of supply within the unit, unless an exception is granted by the Director.

3) Applicant states that the permitted wells will be located on no more than two well pads within the unit, or adjacent thereto, unless an exception is granted by the Director.

4) Finding that the authorization of up to four horizontal wells in an approximate 1,280-acre drilling and spacing unit for the development of the Niobrara Formation on the Application Lands, and the authorization of 460' subsurface boundary setbacks and 150' interwell setbacks will prevent waste, protect correlative rights, and

maximize the efficient and economic production of the Niobrara Formation in the Application Lands.

5) For such other findings and orders as the Commission may deem proper or advisable in this matter.
