RE: Waiver of Rule 305.c 20-Day Notice Requirement
Wooly Bugger 34-20 Well - Permit in Process
Township 19 South, Range 69 West: Section 20: SE/4
Fremont County, Colorado

Dear Mr. Neslin:

I am writing as the surface owner for the above referenced well location. I have a Surface Use Agreement in place with Pine Ridge Oil & Gas, LLC the operator of the proposed well. Please accept this letter as my notice to the COGCC to waive the required 20-day Notice Requirement referenced in Rule 305.c regarding the above referenced oil well location. The procedure for the granting of this waiver is set forth in Rules 303.1.2 and 502.b.

I understand that Pine Ridge presently has a rig drilling in the Florence Area that will leave if Pine Ridge is unable to quickly receive a State of Colorado drilling permit for this well. That would result in Pine Ridge incurring additional expense and delays.

Pine Ridge will drill this well from an existing pad which will minimize surface disturbance. I support Pine Ridge's drilling program and for this well to be drilled as soon as possible. As I understand it, this well is to replace a well that Pine Ridge just drilled (ApacheGold 34-20). The ApacheGold well encountered production at a shallower level than anticipated (and has been completed as a producer) so the original target was not reached. The new well is designed to drill to that previous target. Also, I think this situation has occurred because drilling of earlier wells has gone faster than expected.

I would appreciate it if the COGCC would cooperate on this matter. Thank you.

Sincerely,

Bob Boecker
