Greetings, Gage:

Though I beg to differ (somewhat) from the temp-log TOC, it is still far enough above the TOG (and presumed top perf). And no bradenhead pressure. Good supporting data.

Encana can defer the CBL on the subject well.

**Comments:**

This well was cemented with good, full returns and annulus held for 4 hrs prior to setting casing slips. CBL will be performed when rig is off pad. Temp log is attached.
