As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Water management personnel did not follow company protocol during flowback operations and connected a pump to a wrong water transfer line which resulted in a 2 bbls spill. The contractor immediately stopped the operations and recovered one barrel of the released flowback water. The entire spill was contained on the well pad. None of the fluids left the location.
