Jason,

Please consider this email as notice that the Urie #1 should not produce any fluid to any tank on location that does not have proper secondary containment.

If there are NO tanks on location that have proper secondary containment; NO fluid shall be produced.

Spill number 400871277, reported 7/21/2015 had a reported volume of, between; 2-10BBLS, this volume would have been contained in a properly sized secondary containment.

This email will be uploaded to the well file as "Spill Prevention-Communication".
