RE: Rule 318A.m Minimum Intra-well Distance Exception

Alicia 12-15H-4N Well:

SHL: 595' FSL, 1873' FEL, SWSE Sec. 12-T1S-R68W,

Top of Producing Zone Location: 460' FSL, 1891' FEL, SWSE Sec. 12-T1S-R68W

BHL: 460' FNL, 1891' FEL, NWNE Sec. 12-T1S-R68W

Dear Mr. Lepore,

Mendell Finisterre II LLC (MFII) respectfully requests that the Director grant an exception to Rule 318A.m for the above well. Per COGCC Rule 318A.m, no horizontal wellbore lateral shall be located less than one hundred fifty (150) feet from any existing or permitted oil or gas wellbore unless waived in writing by the encroached upon well. As currently planned, the wellbore of the above well will lie within 150 feet of the vertical wellbore of the captioned well:

Tudex Reinholt NC4, API 05-001-09365, Mendell Finisterre II, LLC

Mendell Finisterre II, LLC, the operator of the encroached upon well, waives Rule 318A.m. Please see MFII's Anti-Collision Mitigation BMP listed below.

Anti-Collision BMP: Prior to drilling operations, Operator will perform an anti-collision scan of existing offset wells that have the potential of being within close proximity of the proposed wells. This anti-collision scan will include definitive MWD or gyro surveys of the offset wells with included error of uncertainty per survey instrument, and compared against the proposed well path with its respective error of uncertainty. If current surveys do not exist for the offset wells, Operator may have gyro surveys conducted to verify bottom hole location. The proposed well will only be drilled if the anti-collision scan results indicate that there is not a risk for collision, or harm to people or the environment. For the proposed well, upon conclusion of drilling operations, an as-constructed gyro survey will be submitted to COGCC with the Form 5.

Mendell Finisterre II LLC respectfully requests that the above well be approved. Please contact the undersigned at 720-420-5700 with any questions.

Sincerely,

Paul Gottlob
