Kelsi,

COGCC is reviewing the Bolton Form 2A (doc no 400700334). Please address the following:

1. The land use is indicated as crop land, yet under the Plant community section the Plant species is checked as NRCS. If the area is really cropland, with your concurrence, I will remove the NRCS check.
2. With the consolidation of the two locations, please review the access to the facility. The current access from County Road 3. The current location of production is further west, so please explain why County Road 34 is for temporary and not permanent access to the location?

Please let me know if you have any questions.

Thank you,
Rebecca

Hi Rebecca,

Please go ahead and remove the NRCS check, as the land use is cropland. I need to check with my field team about the access road and I will get back to you as soon as I have answers.

Thank you!

Kelsi

Hi Rebecca,

The reason PDC chose to only have a temp access off CR 34 and put the permanent access off of CR 3 is because the traffic volume is significantly higher CR 34 than CR 3. Please let me know if you have any additional questions on this.

Thank you!

Kelsi
