[ACTION REQ'D] Compliance Warning for Form 5 #400451961

Andrus - DNR, Katrina <katrina.andrus@state.co.us>

Fri, Jan 15, 2016 at 12:04 PM

To: Angie.Galvan@stxra.com

Angie,

The permitting review of Form 5, document #**400451961** has resulted in this form being returned to draft for the following missing or inaccurate information:

- As drilled coordinates are missing.
- Rig release date is missing.
- Kelly bushing elevation must reflect total elevation (e.g., 4905).
- More than two formation tops must be reported.
- A digital image file of Gamma Ray log must be provided in .pdf format.
- Missing log: Cement Bond Log image file in .pdf format.

All missing information must be supplied and inaccurate information must be corrected on the Form 5, which must be re-submitted no later than **1/22/2015**. This email serves as a warning that this well is not in compliance with Rule 308A which requires submission of a complete and accurate Form 5 within 60 days of rig release. Formal enforcement may result due to a lack of compliance if the Form 5 cannot be completed by the required deadline.

I will be happy to assist you with any questions you have regarding these issues.

Thank you,

Katrina Andrus
