**Inspector Comment:**

COGCC Integrity Inspection performed on August 9th, 2016 in response to initial form 19 spill report Doc #401088702 received by the COGCC on 08/03/2016 that states the following: Dump lines rotted out causing the spill. Discovered while plugging the well. The well has been plugged so the spill has stopped and been contained. Currently the contaminated soil is being dug out in a 70 foot by 70 foot square and hauled out to the Erie landfill. The equipment/ flowline section of this report has details of the observations made during this field inspection. Photo's uploaded can be accessed via link(s) at end of this report.
