2 CA# 116771

Corrective Action: Operator shall comply with Rule 1003 standards for the northeastern interim areas that will not be needed for future operations. This is not the ideal time to reseed but the Operator shall, at a minimum, stabilize the northeastern interim area, as these areas are susceptible to further wind erosion.

Date: 07/11/2018

Response: CA COMPLETED

Date of Completion: 07/23/2018

Operator
Comment:

As discussed in a follow up conversation, the northeastern section of the interim reclaim noted in this CA will be redisturbed by drilling and completion activities. The topsoil was scraped off of the interim reclaim and stockpiled. Upon completion of the pad expansion, road base will be spread to stabilize the location. Interim reclamation will take place within 6 months of the first date of production. Please see the attached pictures of active construction in the area of concern.
