Final Land Use: \_\_\_\_\_

Reminder: \_\_\_\_\_

Comment: Project area is surrounded by sagebrush shrubland and oil and gas development. Revegetation is spotty, progressing within portions of the project area, but sparse in areas around the well head and the former access road. This could be a result of poor seed recruitment or soil issues such as inadequate decompaction. This should be evaluated and spot treatments conducted in areas with poor revegetation. See attached photos.
