Pit Status Determination

Updated Pit Status: Closed

Pit Status Date: 5/1/1996

Timing of Pit Closure:

closed pre-1997 per Sundry Notice Doc 226184

Pit Status Review Summary:

well file documents and pit inspection confirm existence of a 25x25 produced water pit at the John Ford #1 well. Aerial imagery shows pit on location in 1989. Well file and followup inspections support that pit was closed pre-1997 when well was abandoned and therefore only required to meet 1000-series Reclamation Rules requirements.
