Attn: Mr. W. J. Pearson

Subject: Core Analysis Data
L. W. Bailey No. 1-35 Well
Powers County, Colorado
CLI File 3402-8423

Gentlemen:

Diamond cores were taken in the L. W. Bailey No. 1-35 Well. Seven selected samples were preserved by a representative of Michigan Wisconsin Pipe Line Company and then shipped to the Oklahoma City laboratory for analysis.

Full-diameter samples were prepared for analysis. The measured data presented on the attached page one of this report were obtained using the density balance method.

The analyzed interval has low matrix permeability and porosity development along with residual fluid saturations exhibiting high total water values, suggesting poor hydrocarbon potential in this zone at this location.

The cores have been shipped to you in Denver.

We are pleased to have this opportunity of serving you.

Very truly yours,

CORE LABORATORIES, INC.
