Comment The cut slope is not stabilized and vegetation did not appear to be establishing. This area was documented to be seeded and tracked in. This may not have been adequate way to stabilize the seed and the seed may have washed away. There are signs of erosion along the cut slope. This area must be stabilized and may require additional reseeding.

Corrective Action Comply with the 1003 interim reclamation rules.
Stabilize the cut slope.

Comment:		<div style="border: 1px solid black; padding: 5px; color: blue;"> The road has been graded since the previous inspection. Some areas along the road may require gravel to prevent rutting and erosion. The culverts have been repaired however, one culvert was noticed to be partially filled in with sediment. Ongoing maintenance is required. Stormwater controls must be installed to good engineering practice. </div>
