 (Well No.) (Lease) (1/4 Sec.) (Sec.) (Twp.) (Range) (Meridian)

The Well is located 1980 Ft. (N) of Section Line and 660 Ft. (E) of Section Line. (W) *Warty Bank*

The elevation above sea level is 4800 Ft. Estimated

Details of Plan of Work: (State names of and expected depths to objective sands. Show sizes, weights, and length of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

It is planned to drill an oil and gas test well with rotary tools deep enough to thoroughly test both the "D" and "J" sand formations with a total depth at approximately 5000 ft. Approximately 120 feet of 8 5/8 inch surface casing cemented with 100 sacks of cement will be set. Should production be encountered 5 1/2" casing will be set through the producing formation and cemented at that point. Top of the "D" sand is expected at approximately 4930' and the top of the "J" at 4980.
