**General Comment:**

This is a reclamation inspection of the Model 44-10 well site which was plugged and abandoned on 4/15/2010.  
A variance request of select requirements of final reclamation was approved with COA's.  
See attached photos and additional details within this report.

VEGETATIVE COVER \_\_\_\_\_

Comment:

The access road and location remain by approved reclamation variance. The erosion issues previously observed have been repaired. The vegetation is establishing along the side of the main road and water bars have been installed. There is an area where a berm was installed and sloped into a drainage area. This area has not revegetated and there were also a few plants that appeared to be noxious weeds. There were a few berms noticed ascending toward the location that can use some minor maintenance. Overall the vegetation appears to be establishing well throughout the location. See attached photos

Corrective Action:

Comply with 1004 Rules.

Comment

User

Date

The corrective action date was provided to allow additional seeding to coincide with typical monsoon moisture in July for the region.
