**General Comment:**

This is a construction inspection of the Roaring Fork #14-28 location.  
See attached photos and additional details within this report.

**Location Construction**

Location ID: 472941 CDP: \_\_\_\_\_

Comment: The topsoil has been salvaged and stored around the perimeter of the location. It appears additional topsoil could have been salvaged based on color change in soil horizon shown in pit area. The topsoil must be stabilized and protected from degradation and erosion. The topsoil was machine tracked however, tracking is only a short term temporary control. The topsoil is not properly stabilized and is susceptible to erosion.

Corrective Action: Comply with 1002.c
