Waters of the State ☒ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Potential impacts to soil and shallow groundwater were observed beneath the separator during facility closure activities on 3/1/21, and 170 feet east of the separator, beneath the partially buried produced water tank on 3/2/21. The potential release was discovered at 3:35 pm on 3/1/21 and at 2:30 pm on 3/2/21. 24-hour notifications were made for each discovery due to there being 2 different potential release points. However, both potential releases are being addressed in this combined Initial Form 19. The potential releases were completely contained on-site, surface water was not impacted, no injuries occurred as a result of the releases, and cleanup is ongoing.
