478370	SPILL OR RELEASE	AC			-	Suckla-Brown Unit 17 Header	EI

General Comment:

This is an environmental inspection. There were no operator or contract environmental personnel on location at the time of this field inspection.

Inspection of spill area only, not of nearby facilities. Any corrective actions from previous inspections that have not been addressed are still applicable.

Environmental**Spills/Releases:**

Type of Spill: OIL

Estimated Spill Volume: _____

Comment: Spill remains open beyond 45 day COA. At time of inspection pipeline was exposed and flowline was in service. However, impacted soil remains in situ and in contact with groundwater. A hydrocarbon sheen was observed on groundwater (Photos 1&2).

Corrective Action: Per COA on Form 19 Document #402517683 submitted on 10/23/2020: Operator will provide documentation justifying closure within 45 days of spill release (11/15/2020). Documentation shall include confirmation soil sample analytical data that verifies compliance with Table 915-1, a sample location diagram, summary table of analytical results compared to table 915-1 standards, analytical lab reports, and disposal manifests. If investigation and remediation require further actions beyond 45 days then submit a Form 27 for approval within 45 days of spill which includes an implementation schedule and remediation workplan for the spill clean-up. Operator is also required to provide an updated root cause of the incident and preventative measures that will be taken to prevent reoccurrence. Please give the location of the failure (i.e. 6 O'clock position) and if the root cause is corrosion explain if it is external or internal.
