☐ LOCATION CHANGE (SUBMIT NEW PLAT)
☐ WELL NAME CHANGE
☐ OTHER:

Water Disposal

14. DESCRIBE PROPOSED OR COMPLETED OPERATIONS ON THIS FORM (Clearly state all pertinent details, and give pertinent dates,
including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical
depths for all markers and zones pertinent

15. DATE OF WORK

GASCO proposes to use produced water from the nearby Canadian River field as a source of makeup water for the
"Pierre B" waterflood operated by Conoco.

The Canadian River field is currently the sole source of natural gas for the town of Walden and the surrounding
community. Water production has recently increased in the field and is jeopardizing production. There is currently no
economic way to dispose of produced water in the area. This Sundry proposes that GASCO truck produced water from
Canadian River to McCallum Unit Pierre B injection facilities until a water disposal well is obtained for Canadian
River. Produced water will be limited to the A-1 Muddy, and the State 1 and A-10 Lakota.

Verbal approval of this proposal has already been obtained by Steve Miller with Conoco and the Associate
Director for the Colorado Oil and Gas Commission, Brian Macke.

I, I hereby certify that the foregoing is true and correct
