Field

1 A. R. Menter NW 27 12N 47W 6th P.M.
 (Well No.) (Lease) (1/4 Sec.) (Sec.) (Twp.) (Range) (Meridian)

The Well is located 660 Ft. (N) of Section Line and 1986 Ft. (E) of
 Section Line. (S) (W)

The elevation above sea level is _____ Ft. (Will be furnished later.)

Details of Plan of Work: (State names of and expected depths to objective sands.
 Show sizes, weights, and length of proposed casings; indicate mudding jobs, cementing
 points, and all other important proposed work.)

We propose to drill a well on the above described location using
 rotary tools. Approximately 300' of 8-5/8" OD 24# J-55 casing will
 be set as surface casing and cemented to surface by an approved
 method. A 7-7/8" hole will be drilled through the Dakota formation,
 and an electric log will be run to total depth. Dakota formation
 estimated at 3748', estimated total depth 4000'.

If any formation is found to be commercially productive, 5-1/2"
 OD 14# J-55 casing will be run and cemented by an approved method.
 The casing will then be perforated and the well prepared for pro-
 duction.
