General Comment:**COGCC Inspection Report Summary**

On Monday 4/25/2022 at approximately 1000, I, Inspector Scott Ramsey, conducted a routine inspection at TEP RU 12-7, at Location # 324016 in Garfield county Colorado.

Any Corrective Actions from previous Inspections that have not been addressed are still applicable.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management and 411 water protection. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad.

During this inspection the following possible compliance issues were observed:

1. Some Areas on location show signs of lack of stabilization/ compaction/ degrading.
2. Some riling at tanks.
3. Some sediment has been pushed off of location/access.
4. Stored equipment (dehy is disconnected from anything)
5. Valves on tanks missing caps/plugs.
6. Unknown fluid in tank containment.
7. Chemical tank labeling is illegible.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.
