General Comment:

On 06/16/2022, Reclamation Specialist O'Malley conducted a final reclamation and stormwater inspection at the Arkansas Post-67N93W 12SEW Location #333052 in Moffat County, Colorado.

This inspection report is being sent to both Foundation Energy LLC #10112 and Quicksilver Resources Inc #10255. Presently, according to COGCC records Foundation Energy Management LLC is the Operator of this Location. Form 10 Change of Operator (doc #402518194) to change the Operator to Quicksilver Resources Inc is "In Process" Until the change of Operator Form is approved by COGCC, both Operators will receive inspection reports.

The following compliance issues were observed during this inspection:

- Noxious Weeds
- Final reclamation: perennial, non-invasive, uniform plant cover not established

Refer to the "Location," "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Good Housekeeping:

Type	WEEDS		
Comment:	It was observed in this inspection that Scotch thistle, Russian knapweed, and whitetop (List B Noxious weeds) are present on Location. Cheatgrass (List C Noxious Weed) is widespread and dominant in some areas. Russian thistle and desert madwort (undesirable plant species) are also widespread.		
Corrective Action:	Conduct weed management to prevent further establishment and spread of noxious weeds and undesirable plant species on the entire Location; ongoing weed management required until location passes final reclamation.		Date: <u>07/01/2022</u>

Comment:

Refer to the "Location" section of this inspection report for weed control corrective action.

This Location does not meet reclamation requirements; vegetation has not achieved total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. There are areas of the Location where perennial vegetation has not established which are dominated by cheatgrass, a noxious annual weed. These areas are at the southwest, which appears to be the previous site of stormwater controls, at the east, and portions of the access road. A corrective action date of 11/15/2022 is being given to allow for a fall seeding.

Corrective Action:

Conduct additional reclamation in accordance with COGCC 1000 series rules. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 11/15/2022.
