(DETAILS OF WORK)

This well completed as a "J" sand oil well in July 1951 and is now below the economic limit. As there is no other prospective producing zone and is not economical to perform any kind of treatment; It is proposed to plug and abandon by setting a rock and cement bridge above perforations, shoot off and pull casing, fill hole with heavy mud with a cement plug in bottom and top of surface casing, erect a dry hole marker, clean up, grade and abandon location.

NOTE: This well has been sold to NATIONAL SUPPLY COMPANY for net salvage. Plugging report will be made as soon as they furnish us with the plugging information.
