Re: #12-26 L & L Land Co.
Rule #102 Application
(New Reservoir)
Section 26: SW/4 NW/4
T3S - R59W
Adams County, Colorado

Dear Mr. Piro:

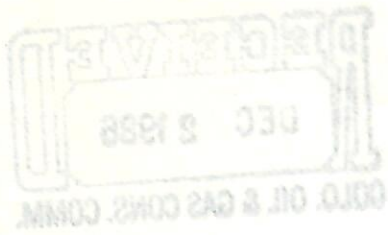

Pursuant to our conversation of November 26, 1986, there are two basic reasons why the #12-26 L & L Land Co. is producing from a new reservoir. First, the flowing tubing pressure is 670 psi and the casing pressure is 980 psi. These are virgin pressures. Secondly, the #12-26 L & L Land Co. is a gas well which is structurally downdip from the Noonan Ranch Field which is an oil field. If you need any additional information, please do not hesitate to contact the undersigned.

Very truly yours,

E. DOYLE HUCKABAY, LTD.
