**General Comment:**

On 1/26/2023, Reclamation Specialist O'Malley conducted an interim reclamation and stormwater inspection at TEP Rocky Mountain LLC's Kaufman pad 6/21A-24-692 Location #418772 in Garfield County, Colorado.

The following compliance issues were observed during this inspection:

- Leaky chemical injection unit
- Stormwater: compaction degradation throughout location, tracking control BMPs not observed

Refer to the "Location," "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

1003 f. Weeds Noxious weeds? P

Comment Areas of the location not needed for production, or no longer in use have been reduced and reclaimed. Introduced perennial grasses (crested and intermediate wheatgrass) appear established in interim areas. Portions of the interim areas which are presently exposed (south facing cut and fill slopes) appear sparsely vegetated with perennials. No noxious weed issues observed at the time of this inspection. However, assessment was impeded by snow cover and dormant season. A follow up inspection will be conducted during a future growing season to determine compliance with 1003 requirements.

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

  

Comment:	<p>At the time of this inspection the location and access road are snow covered; unable to perform full stormwater inspection. However, visible portions of the pad show signs of lack of stabilization BMPs, as is evidenced by the presence of ruts. Tracking control BMPs to minimize/mitigate tracking and offsite sediment transport are missing or insufficient.</p> <p>Stormwater sediment and erosion control BMPs should be implemented and maintained in such a manner that minimizes erosion, transport of sediment offsite, and site degradation.</p>					Date: 02/10/2023
Corrective Action:	<p>Install or repair required BMPs per Rule 1002.f. Continue to monitor and manage stormwater on the Location. Ongoing stormwater management is required until the site receives a passing final inspection.</p>					

  

**Pits:**    ☒ NO SURFACE INDICATION OF PIT
