Comment This location does not comply with Rule 1003. It was observed that portions of the interim areas have not revegetated to reflect adjacent reference areas, with evidence of undesirable vegetation and areas of non-uniform cover resulting in bare soil. Additionally, it appears half of the interim area has been managed (e.g. mowed) while the unmanaged portion appears to be predominantly undesirable species (e.g. kochia and russian thistle). Refer to attached inspection photos for documentation.

Corrective Action Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards. Corrective action date is the date the location was observed out of compliance.
