Comment:

<p>This location does not comply with Rule 1004. During this inspection, Staff observed that the location appears to have been reclaimed with evidence of desirable perennial vegetation. However, the former access road and portions of the well location also had evidence of undesirable plant species (e.g. russian thistle, downy brome, and CO List C Noxious weed-field bindweed) and areas of bare/exposed soils. It does not appear the undesirable vegetation was managed for and the plants have seeded out. Additional reclamation activities are required in order to meet Rule 1004 Standards. Refer to attached inspection photos.</p>
