General Comment:

On 8/4/2023, Reclamation Specialist Trujillo conducted an interim reclamation and stormwater inspection at Nonsuch Natural Gas Inc's CSOC 697-22 #1 location in Garfield County, Colorado.

This inspection is a followup to:

#696201613 dated 8/4/2020;
#696201798 dated 9/16/2020;
#696201986 dated 11/2/2020;
#701101602 dated 6/14/2021;
#696202914 dated 7/12/2021;
#696203083 dated 8/23/2021;
#696203322 dated 11/1/2021;
#696203530 dated 3/28/2022;
#696204028 dated 8/30/2022;
#696204551 dated 12/27/2022;
and #696205106 dated 7/14/2023 to document compliance with the following corrective actions:

- Stormwater
- Interim Reclamation
- Noxious Weeds
- Wildlife Protection Devices at containers
- Inadequate BMPs to restrict access by unauthorized persons, livestock and wildlife to the Pit

This inspection is also a followup to NOAV #403104457.

It was observed in this inspection that the Location remains out of compliance with ECMC Rules, inspection and NOAV corrective actions.

Any corrective action(s) from previous inspections that have not been addressed are still applicable. The "Date of Discovery" is being provided as the corrective action date for all new observed compliance issues. Location will remain out of compliance until corrective action(s) has(have) been resolved. A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Corrective Action **Comply with 1003 rules and conduct additional reclamation: Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Implement erosion controls to stabilize the seeded soils, and continue to monitor and manage this site until Final Reclamation has passed.**

Fencing:

Fencing Type: Netting/Fence com

Fencing Condition: Inadequate

Previous inspection observed that the fencing on the north end of the pit has broken. Inspection required Operator to maintain fence at the pit.

Comment: It was observed in this inspection that fencing at the pit remains in disrepair; evidence of livestock (cattle) entering the fenced pit area observed.

The CA has not been addressed and remains applicable.

Corrective Action

[Maintain fence at pit to prevent unauthorized access to pit by people, livestock and wildlife.](#)

Date: 07/14/2023

Netting:

Netting Type: Fence/Net Combo

Netting Condition:

Previous inspection observed that the pit was uncovered, and that the netting was stored along the perimeter of the pit. Inspection required Operator to replace netting over the pit.

Comment: It was observed in this inspection that the netting has not been replaced, and the pit remains improperly covered to minimize impacts to wildlife.

This CA has not been addressed and remains applicable.

Corrective Action

[Replace netting over pit.](#)

COGCC Comments

Comment	User	Date
<p>RECLAMATION COMMENT</p> <p>Previous inspections documented that the interim areas of the Location are not progressing towards COGCC 1003 reclamation standards; Soils on interim areas predominantly bare and exposed; Soils appear to be subsoils.</p> <p>Inspections required Operator to conduct additional reclamation and ensure erosion controls are implemented to stabilize the seeded soils by 10/31/2020.</p> <p>In addition to inspection reclamation requirements, corrective actions per NOAV #403104457 also required the following by 8/12/2022:</p> <p>“Operator shall submit an interim reclamation plan, to be approved by COGCC staff for the establishment of vegetation for disturbed areas no longer in use. The plan will include Operator’s approach to monitoring the growth and establishment of vegetation after reseeding and reporting to staff on a bi-annual basis the monitoring data until interim reclamation is complete. Upon completion of work, Operator shall submit documentation of work performed attached to a Field Inspection Report Resolution Form. Documentation shall include, at the least, invoices, the seed mixture provided by surface owner, and dated photographs of the reclamation in sufficiently high resolution so that details are readily discerned”.</p> <p>Unable to find evidence that additional reclamation was performed and control measures to stabilize the seeded soils installed per the corrective actions; Location remains mostly bare, or vegetated predominantly by Undesirable Plant Species; no reclamation plan has been submitted by Operator; No Resolution Form has been submitted by Operator to document that corrective action has been addressed, or to provide the required documentation.</p> <p>Location remains out of compliance with 1003 Rules, and NOAV requirements.</p>	trujilloam	08/10/2023
<p>STORMWATER COMMENT</p> <p>Previous inspections documented that BMPs to stabilize/protect, and manage runoff in a manner that minimizes erosion, degradation and sediment transport from the cut/fill slopes and access road of the Location were missing or insufficient. Inspections required Operator to comply with Rule 1002.f.</p> <p>It was observed in this inspection that control measures remain missing or insufficient to stabilize, minimize erosion, manage runoff and prevent off-site sediment transport from the Location (cut/fill slopes and access road); Operator appears to have previously graded the access road, however control measures to manage runoff remains inadequate, and erosion degradation has persisted.</p> <p>Original corrective action and date remains applicable.</p>	trujilloam	08/10/2023
