Reclamation Specialist	<p>The approval of this Form 4 is an acknowledgement that the document was received. It is not an approval of the proposed reclamation plan and analytical results. ECMC Staff had a meeting with SoilSage lead contractors on 8/22/2023 to review reclamation plan, and have provided the following recommendations:</p> <ul style="list-style-type: none"> · Summary of disturbance: clarify extent of disturbance, associated access roads, and tank batteries. Include all areas of disturbance from oil and gas activities in summary. · Label sample points that clarifies which points are related to soil and vegetation sample points, and the corresponding photos. · Include pictures of soil profiles that shows soil horizons and associated depths. · Include information about topsoil replacement, including amount (in cubic yards), information about where imported topsoil is originating from with associated soil analytics. · Clarify that seed mixes match reference vegetation and include accurate scientific names · Specify seed bed preparation · Clarify soil analytics (i.e., tests were used in analyses, Calcium carbonate percentages, etc.) <p>Please submit a new form 4 with the information adjusted on the reclamation plan and include the original soil analytical data from the lab.</p>	08/30/2023
