VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____ F _____

Comment Interim areas are not progressing towards 1003 revegetation standards. Perform reclamation per Rule 1003. All areas compacted by drilling and subsequent oil and gas operations which are no longer needed shall be cross-ripped to a depth of 18 inches. Establish vegetation with total perennial, non-invasive uniform plant cover of at least 80 percent of reference area levels. Use surface owner seed mixture, or one prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage the site. Vegetation in interim areas are predominantly undesirable species (Kochia, Russian thistle). Weeds are impeding the perennial vegetation. See good housekeeping section

Corrective Action Comply with Rule 1003. The corrective date is not intended to be the date for which the Operator shall complete the corrective actions but rather the corrective date is the date the location was observed out of compliance.

Date **10/09/2023**

Overall Interim Reclamation **Fail**
