VEGETATIVE COVER FAIL

Comment: The perennial vegetation has not yet established at the location. Vegetation transects were performed documenting insufficient vegetation cover. The west side of the location consists mostly of undesirable weeds and there is an area along the reclaimed access road which consists mostly of weeds. Additional reseeding will need to be performed in the fall season. Corrective action will remain out of compliance until completed.

Comment: There was additional BMP's installed along the roadside since previous inspection. There was rock check dams installed however, small round rock was used which may not hold in place. There is still an erosion channel along the center of the road and there is erosion along the cut slopes of the roadside. These areas of erosion identified in the attached photos will need to be repaired and stabilized. Corrective action will remain out of compliance until completed.

  

Corrective Action: Install or repair required BMPs per Rule 1002.f.(2)
