Comment:

Corrective Action:	<p>All equipment has been removed at the well location (Location ID 336335) but the access road still remains on site. The access road gravel still remains and has yet to be contoured. The well location itself has some perennial vegetation (satlgrass) growth but is dominated by large areas of bare ground and encroaching russian thistle.</p> <p>The well location is not representative of the reference (dominated by saltgrass, smooth brome and wheatgrass) area as seen in the inspection photos.</p> <p>On location tank batteries have been removed.</p>	Date 11/02/2023
<p>Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p>		
<p>Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input checked="" type="checkbox"/></p>		

Storm Water:
