Non cropland: Revegetated 80% **Fail** Cropland: perennial forage \_\_\_\_\_

Weeds present **Fail** Subsidence \_\_\_\_\_

## 1004.d. FINAL VEGETATION TRANSECT

TRANSECT RESULTS OF DISTURBED AREA% 6

TRANSECT RESULTS OF REFERENCE AREA% 35

TOTAL % OF DESIRABLE VEGETATION COVER 17

VEGETATIVE COVER FAIL

Comment:

The location has not established a uniform perennial vegetation cover of at least 80% of reference area levels. There is an area approximately 120' x 50' with mostly undesirable weeds and two other deficient areas. It appears there are impacted soils preventing perennial vegetation establishment due to multiple attempts at reseeding. It also appears that the location has been recently drill seeded. An agronomic soil analysis will need to be performed to evaluate soil conditions. Continue to monitor and maintain the location until the final reclamation requirements are achieved.

Corrective Action:

Comply with 1004 Rules
