Comment:

The well location and to the South appear to have been reclaimed with perennial growth throughout the fenced area.

Reclamation rules require reclamation activities to be conducted within twelve months of plugging on non-cropland. The last well was plugged 12/8/2022. It does not appear any reclamation work has been performed on the production area; the gravel pad production facility and access roads remain and have not been recontoured or regraded, one small production building remains as well as fencing around the Southern area that appears to have been reclaimed. The operator shall perform final reclamation by 12/8/2023
