(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

18. Date of work July - 1978 * Must be accompanied by a cement verification report.

Spudded 7/10/78
 8-5/8" Conductor pipe set at 15' G. L.
 5-1/2" 15.5#/ft. casing set at 916' G. L. and cemented from T. D. to 439'
 with 200 sxs.

This well was drilled into the Vermejo coal seams to determine if commercial production of methane was possible.

The coal seams turned out to be very thin and of low gas content so the well was not perforated.

The well will be turned over to CF & I to be used as a water well at a later date.
