Colorado Springs, Colorado 80944

Dear Mr. Buffetti:

Recently you responded to two requests for information concerning two coal bed methane test wells in Las Animas County, Colorado, by stating that CIG had no wells in the area and that we must have an error in our records. The facts are that CIG permitted these two wells (See Attachment) and, according to Sundry Notices, OGCC Form 4's dated August 1979, drilled these wells in July of 1978.

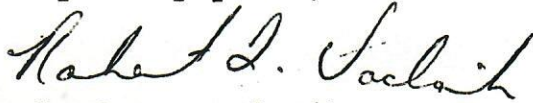

According to various notes and documents in the files, CIG operated the test wells in a joint venture with CF & I and the U.S. Bureau of Mines. Although the above referenced memos indicate that the wells were to be turned over to CF & I as water wells, CIG, as operator of record, was, and still is, required to furnish this office with well data. Included among the most important information we require on these wells are copies of any electric logs that were run, casing and cementing details, depths of geologic tops and plugging or plug-back details. You should also provide any other information as needed to complete our Well Completion Report, OGCC Form 5, a copy which is enclosed.

In the event that the wells were turned over to CF&I as water wells, I would appreciate the name of the person at CF&I who now administers these wells, in addition to the above listed information.

Mr. Victor J. Buffetti
